COLLECTIVE VISION

I: Create, support, and sustain high quality academic programs that promote student and faculty success and deliver high quality degrees

II: Prepare students for post-graduate opportunities so that they may thrive in a diverse and global work environment.

III: Make equity, diversity and inclusivity a habit that is implemented, practiced, modeled consistently by all members.

IV: Achieve a desirable workplace environment in which there is equitable workload supported by resources, transparent communication and mutual respect.

V: Sustain and expand effective and transformative teaching practices that offer opportunities for students to excel both in and out of the classroom.

MAKING INCLUSIVITY A HABIT

WISE: Women for Inclusivity in Science and Engineering

WISE shapes the dialogue around the intersections of equity, community development, and support groups who are historically underrepresented in Science and Engineering.

Marie Johnson, Ph.D.
CSUF Dean, College of Natural Sciences and Mathematics

Women for Inclusivity in Sciences and Engineering invites all faculty to an online panel discussion with STEM deans from across the CSU. The panel will focus on their leadership journeys, as well as advice for faculty at any stage who are interested in strengthening their skills as leaders. For questions, email cynthia.flores@csuci.edu or lydia.dixon@csuci.edu.

13th April MEET ON ZOOM
3:00-4:15 pm Panel Meeting ID: 868 1527 8884

LAB SAFETY WEEK

February 12 - 16, 2023

SAFETY IS FOR EVERYONE!
LAB SAFETY WEEK - FRIDAY

Safety is everyone's responsibility. When each person in the lab does their part, the lab is a safer place to work.

- Avoid working alone in the lab. Notify others if solitary work cannot be avoided and have someone periodically check in.
- Review standard operating procedures and follow them carefully.
- A clean lab is a safe lab! Keep areas tidy and organized.
- Review standard operating procedures and follow them carefully.
- Frequently check hazardous waste accumulation storage areas and arrange for disposal as needed. Avoid accumulating large amounts of hazardous waste.

GOOD LAB HOUSEKEEPING
LAB SAFETY WEEK - TUESDAY

Good lab housekeeping minimizes the number of slips, trips, and falls.

Space is always at a premium. Don't be a hoarder.

Reducing more clutter in the lab.

SAFETY EQUIPMENT
LAB SAFETY WEEK - WEDNESDAY

Identifying, getting familiar via training, keeping and maintaining safety equipment is critical in protecting and saving lives and health in emergency situations.

- Emergency showers, eye showers, fire blankets, proper PPE when conducting equipment keep the community safe.
- Check if appropriate safety equipment are present and in good condition. Replenish immediately if used.
- Having a regular training for safety equipment is essential. Service damaged equipment immediately.
- Access to the eyewash, fire extinguisher, fire shower, fire extinguisher, spill kits must be unobstructed.
- Know the location of the nearest emergency eyewash and shower before starting any work in the laboratory.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
LAB SAFETY WEEK - MONDAY

PPE HELPS TO MINIMIZE EXPOSURE TO HAZARDS THAT CAUSE SERIOUS WORKPLACE INJURIES AND ILLNESSES. THESE INJURIES AND ILLNESSES MAY RESULT FROM CONTACT WITH CHEMICAL, RADIOLOGICAL, PHYSICAL, ELECTRICAL, MECHANICAL OR OTHER WORKPLACE HAZARDS.

- Basic protection for most laboratories includes safety glasses, shoes, and proper shirts/pants.
- Closed-toed shoes are essential in a laboratory to protect yourself from chemical splashes or broken glass.
- Chemical splash goggles or face shield should be worn when there is a risk of splashing hazardous materials or flying particles.
- If respirators are to be used for protection against airborne contaminants, equipment must be approved by the Mine Safety and Health Administration and NIOSH. It may be used if properly selected and fit-tested as part of a complete respiratory protection program.
- Any laboratory operation that exposes laboratory personnel to a significant noise source of 80 decibels or greater for an 8-hour average duration should utilize hearing protection in the form of earplugs or muffs.

LAB SAFETY WEEK
