Brief Activity Description	I will teach the chemistry capstone course CHEM499 this coming fall semester. In this course, students in their final academic year learn to communicate scientific information to other scientists. Students present scientific information from work completed or work-in progress of their independent research (CHEM494), internship (CHEM492), or extensive literature research. I would like to invite colleagues from different other institutes to talk about their research projects and opportunities for students to join graduate programs. I am planning to invite two faculty, and the IRA fund will be used to accommodate these speakers.
Learning Outcomes and Relation to IRA to Course Offerings	Chemistry Capstone: Students will gain experience in representing and communicating scientific information. Students will learn about opportunities to pursue a graduate degree Learn about different research projects and research programs
Description of Assessment Process	Students evaluations and comments. The number of students who decided to apply for graduate programs. the quality of students' oral and poster presentations.
