

# 2015 Graduating Senior Survey

***Fast Fact: 44% of CI Graduates have secured post-graduation employment, up 10 percentage points from 2014***

## Survey Summary

- Administered to 1,444 graduating seniors when they apply for graduation, March 2015 – June 2015

## Post-Graduation Plans

- 62% of computer science majors and 54% of business majors secured post-graduation employment, the only major groups above 50%.
- 43% of male graduates secured employment vs 35% of female graduates.
- White and Hispanics graduates reported securing post-graduation employment at about the same rate, 37%.

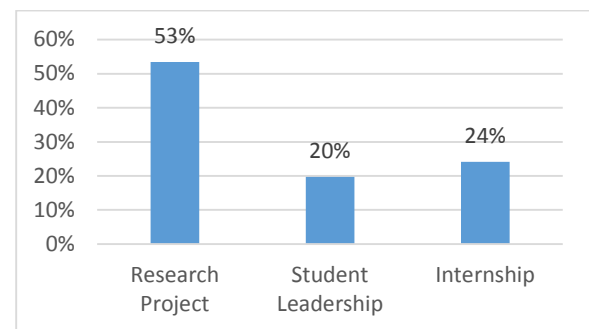

## Where did graduates who got jobs learn about them?

- Most graduates learned about their job through existing relationships.
- 17% of graduates reported learning about their job through CI resources.

## CI Graduates are very satisfied with the CI experience!

- 85% of respondents said that if they had to start over, they would still choose to attend CI.
- Nursing majors and Social Science Majors were the most satisfied, with 90% of both majors saying they would choose CI again.
- Business majors were the least satisfied, with 78% of majors saying they would choose CI again.

## Participation in 3 Types of Learning Experiences

- 53% of graduating seniors reported having completed a research project while at CI.
- Nearly 80% of social science majors reported completing research projects, the most of any major group.
- The most commonly cited reason for not completing a research project/ internship was that research/interning was not required for their major (53%), followed by not having enough time due to work obligations (20%).
- Participation in student leadership activities was found to be correlated with the most student success outcomes, including securing a job and planning to apply to graduate school.
