Effective Term This should equal the admit term Residency Select correct code Residency Date Enter first date of term selected above

Quick Enrollment Click this link to access the Quick Enroll component, where you can process enrollment transactions for the student.

Student Program Plan Click this link to access the Student Program/Plan component, where you can make any changes to a new or continuing student's program stack information after the student has been saved to your system.

Viewing Program Stack Data After Saving the Component

When you are updating a new or continuing student's records, only the following fields appear:

Student Career Nbr (student career number) The system uses the student career number to differentiate between academic programs within the same academic career. For students with multiple academic programs within the same academic career, you must select the student career number for which you want to activate the student into the term you have specified. If the student has only one student career number in a specific academic career, the field is unavailable for edit.

Prim Prog (primary program) The system displays the primary academic program associated with the student career number. The primary academic program that appears is the academic program into which the system will activate the student for the term you have specified.
