Requirements and Signatures

Please provide the following in your application:

1. **Brief Activity Description.** Describe the activity and its relationship to the educational objectives of the students' program or major.

The Physics of Music course is designed to give a useful and fun understanding of music and sound for general education, physics and performing arts students interested in music and speech. The format includes lectures, demonstrations, and hands-on activities. After covering the basic foundations of sounds and music, the students investigate each musical instrument group, including percussion, plucked strings, bowed strings, blown pipes, blown reed instruments and the human voice.

To enhance the course, we would like to expose students to a professional orchestra performance. Most of our students have never seen a professional orchestra concert. They are more familiar with electric guitars and rock concerts that have different musical value. The New West Symphony is local and very high caliber. They play often-recognizable classical pieces. The students would hear in concert the instruments they have studied in class. Moreover, this may introduce students to a lifetime of music appreciation beyond the rock concerts.

As the University's Performing Arts Music program grows, we hope CSUCI will have orchestra performances that we can attend on campus rather than off-campus events.

This is not a field trip. The choice of a concert and venue is up to the students and they may go any time prior to the report due date. We offer, however, a great deal on group-discount tickets at The New West Symphony. They have offer \$25 per ticket, which is much less than the normal single-seat ticket prices of \$78.

2. **Relation to IRA to Course Offerings.** All IRAs must be integrally related to the formal instructional offerings of the University and must be associated with scheduled credit courses. Please list all classes that relate to the program proposed.

This proposal would support the existing courses PHYS 335/PAMU 335, which is a 3 unit course, currently taught in the Spring semester. The course examines the sounds of the various instruments in the orchestra. The course is very popular and has an enrollment of 24 students, which is limited by seating in the physics classroom.

3. **Activity Assessment.** Describe the assessment process and measures that the program will use to determine if it has attained its educational goals. **Please note a report will be due at the end of the semester.**

After the concert, the students will write a paper for course credit and answer a brief questionnaire about the visit. The reports will be evaluated to determine the extent of understanding students showed for the physics of the instruments and the sounds observed. Student interest in this activity will also be assessed. The information will be collected into a report at the end of each semester.

4. **Activity Budget.** Please enclose a complete detailed budget of the entire Activity **bold** specific items of requested IRA funding. (Page 4)

The New West Symphony has quoted us a group rate of \$25 per person for the Oxnard venue, where many of our students live. This is a great price compared to the lowest standard price for single seats of \$78. With a 24-student course enrollment, I expect a maximum of 20 students to participate in the group activity. I would like IRA to pay \$15 per ticket while the students will pay \$10 per ticket. Having the students pay part of the cost improves commitment and assures attendance. For some of our student, even \$10 is a challenge in these financial times.

5. **Sources of Activity Support.** Please list the other sources of funding, and additional support for the activity.

Besides paying for \$10 per ticket, students will pay their own transportation and parking. The total cost may be \$250.

7. **Acknowledgment.** Project Sponsor and Program Chair acknowledge that they have reviewed and accepted the Conditions and Considerations detailed on page 2.
