# New CI Records Fluid User Interface

As part of the CI Records version upgrade, a new user interface is being introduced, called Fluid. While the classic dropdown menu that you may be familiar with remains, a new set of icons appear on the right side. These new icons will become the primary CI Records menu navigation with future upgrades. In the short term, both sets of navigations will be available. The Fluid navigation on the right is mobile device responsive and will display better on cellular phones and tablets.

Below is the new CI Records main page after signing in.

To access the new menu navigation, please click on the navigator (NavBar) icon on the top right corner. The NavBar will open up with options to go to Recently Visited pages, Favorite pages, the main navigation Menu, and the Student Center page.

Help

Click on this icon to access the NavBar, which gives you access to Recently Visited pages, Favorite pages, the main navigation Menu, and access to the Student Center page.
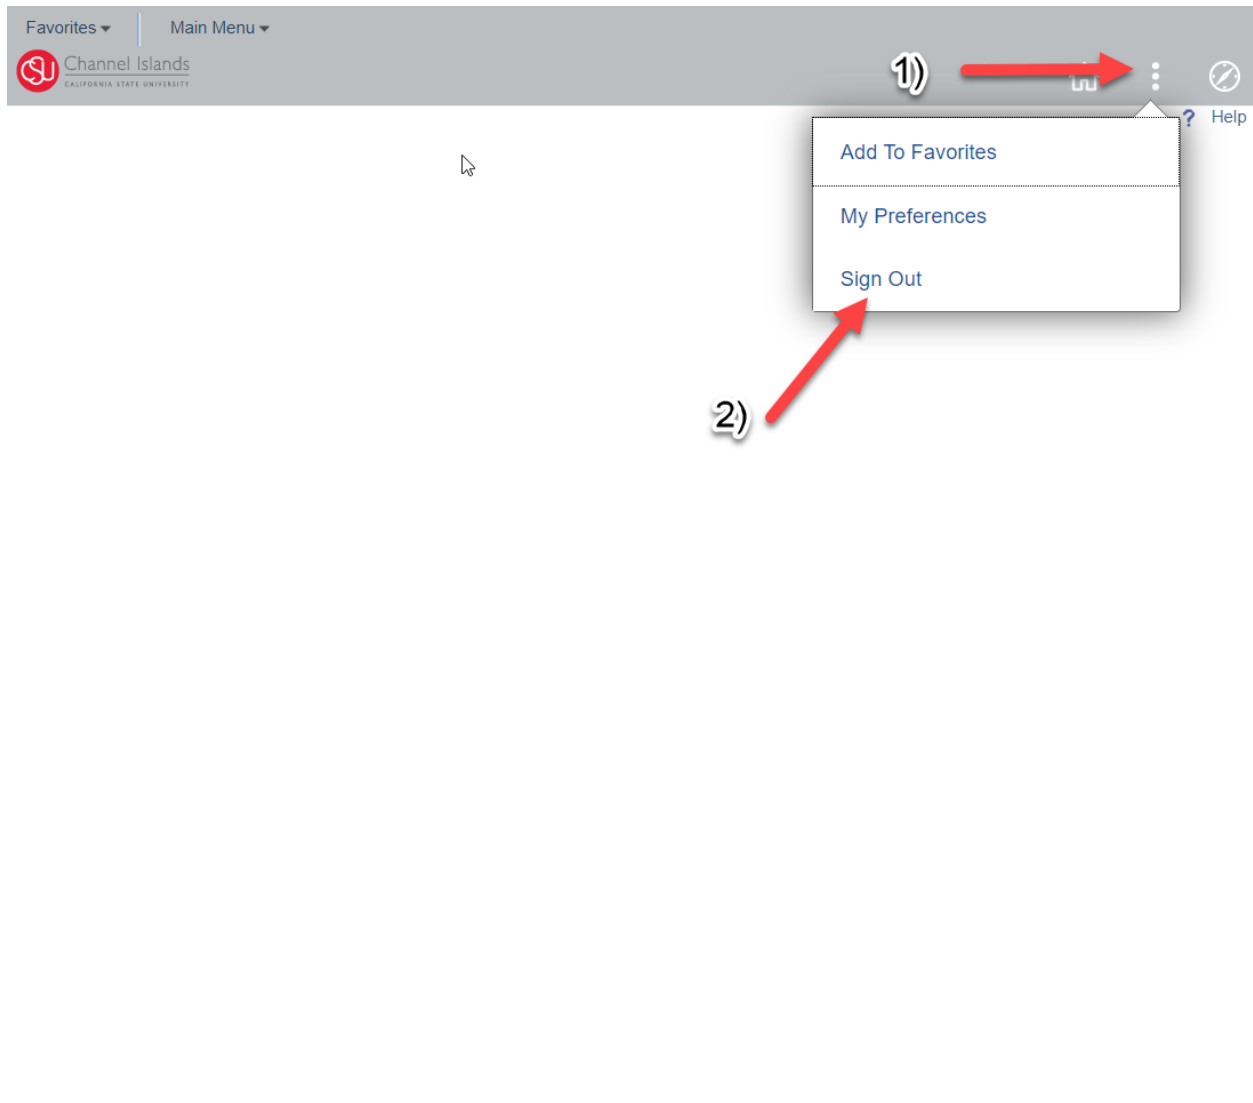

After clicking on the navigator icon, the NavBar will open and appear as shown in the below screenshot.

Below is an image of the main menu navigation shown through the new user interface after clicking on the NavBar icon. The navigation will display the same menus and pages as with the classic dropdown navigation.

To sign out of CI Records, please click on the three dots on the right-side navigation to access the Sign Out option.

For any additional assistance or questions with the new user interface, please contact the Solution Center at solutioncenter@csuci.edu or at 805.437.8552.
