

Honesty:

The CSUCI policy on academic dishonesty will be strictly applied. Students involved in plagiarism, cheating, helping another student cheat, or committing other acts of academic dishonesty will have a failing grade in the course.

Disability Accommodations

Students with disabilities needing accommodation should make requests in advance when application is made for this course. All requests require advance notice to determine what accommodations, if any, are needed.

Tentative Itinerary in Germany:

Day 1: arrive at Hamburg airport, take train to main station, then on to Schleswig

Day 2:

- a) visit the Viking museum, living history museum, and archaeological site of Haithabu
- b) tour of the city harbor

Day 3: visit the Center for Baltic and Scandinavian Archaeology, lectures by specialists
Free time to tour the Schleswig Museum at Schloss Gottorf

Discussions during Days 2 and 3 will focus on the past use of marine/coastal resources, and technology available to past inhabitants of the region, though present coastal resources will also be discussed.

Day 4: travel to Lübeck via regional train, student free time to wander the Medieval city center during the afternoon/evening after settling into the hostel

Day 5:

- a) tour around the city on the Trave River
- b) visit to the Office of Archaeology, tour current archaeological excavations in the city

Discussions and lectures will focus on Medieval life, the Hanseatic League, and trade during the Middle Ages

Day 6: bus/train trip to Travemünde (small city down the Trave river on the coast):

- a) visit the Baltic sea and Travemünde harbor (Travemünde means “mouth of the Trave”)
- b) visit the Priwall and local museum on East/West Germany

Discussions will focus on changing use of the Baltic (fishing giving way to ecotourism), and well as a history discussion given the close proximity of the former East German border, as this was the only East-West crossing at a large West German city; students will be able to see portions of the former fencing and guard posts.

Day 7: travel by train to Hamburg, settle into the hostel

a) afternoon tour of the Hamburg harbor

Day 8: Guest lectures/tour of the Maritime Museum:

a) boating technology through time, from Viking vessels to the cargo container ships of today

b) time to tour Hamburg city center

Day 9: Fisheries day

a) History of Atlantic fisheries through time

b) Fisheries Management today

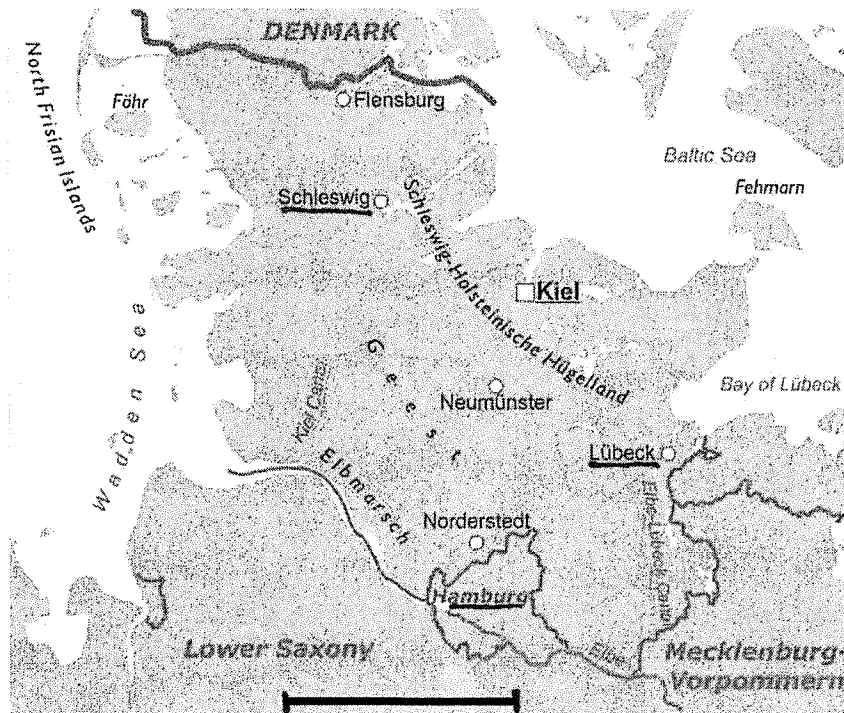

Discussions focused on river ports vs. coastal ports, history of fisheries in the North Atlantic, contemporary fisheries management, changes in marine boating technology

Day 10: visit the Hamburg Chamber of Commerce and Alster lakes

Possible tour of the canals

Discussions focused on daily life in Hamburg and Germany; interaction of folks with the water (Elbe River, Alster lakes, canals; there are more bridges in Hamburg than in Venice, Italy).

Day 11 class ends; students depart

40 Miles
