

**Facilities Services Recent Maintenance Repair and Landscape Activities at University Glen**

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

**Fire Hydrant Flush**

FS Staff this week are examining all the fire hydrants located throughout the University Glen community. The fire hydrants are being tested for functionality in case of an emergency. These functionality tests require the fire hydrants to be temporarily turned on to remove dirt and debris accumulation. This project is being conducted to promote safety and preparation for emergencies in the community.

**Autumn Landscape**

FS Landscape is preparing for the seasonal autumnal changes in the University Glen community. Autumn increases the amount of leaf debris found throughout the streets and walkways of the neighborhood. To mitigate this issue FS landscape staff use leaf blowers on a daily basis to collect and dispose of leaves found on the walkways. Leaves found on the road are normally removed with the use of a street sweeper. Currently FS landscape staff are manually removing the leaf debris from the streets while the university street sweeper is temporarily out of service; please excuse the inconvenience.

Thank you for following our Project Updates!
