

**Facilities Services Recent Maintenance Repair and Landscape Activities at University Glen**

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

**University Glen Landscape Maintenance**

FS Contractors are removing dilapidated trees and are replacing them with healthy ones. The tree maintenance project will be conducted periodically over the course of two years, dividing the community into three phases. The FS Contractors anticipate to finish Phase 1A of the project on February 17th, 2017. Phase 1A consists of trimming the trees located in the Town Center, Anacapa Island to Frenchy’s Cove, Landing Cove to Frenchy’s Cove, Elephant Seal to Landing Cove, Cathedral Cove to Landing Cove, and Channel Islands Drive from Chapel to Frenchy’s Cove.

**Trip Hazard Repairs**

FS Staff continue to repair trip hazards found in the University Glen community. This week a section of the pathway on Channel Islands Drive is being patched and readjusted. These repairs entail the use of fine granite pieces to smooth out the cavities created from the recent rainstorms. This project provides a safer walking environment for the pedestrians at University Glen.

Thank you for following our Project Updates!
