

Facilities Services Recent Maintenance Repair and Landscape Activities at University Glen

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

Valve Exercise Maintenance

FS Staff continue to exercise the utility valves located throughout University Glen. The utility valves are routinely checked for ease of accessibility and damages. The valves are tested to ensure that they can be readily opened or closed in case of an emergency.

University Glen Landscape Maintenance

FS Contractors have finished Phase IA of removing diseased trees and replacing them with healthy ones. Phase IA consisted of trimming and assessing the health of the trees located in the Town Center, Anacapa Island to Frenchy's Cove, Landing Cove to Frenchy's Cove, Elephant Seal to Landing Cove, Cathedral Cove to Landing Cove, and Channel Islands Drive from Chapel to Frenchy's Cove. The tree maintenance project will continue to be conducted periodically over the course of two years, dividing the community into three phases.

Thank you for following our Project Updates!
