

Facilities Services Recent Maintenance Repair and Landscape Activities at University Glen

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

Trip Hazard Repairs

FS Staff continue to repair trip hazards found in the University Glen community. This week a section of the pathway on Channel Islands Drive has been patched and readjusted. These repairs entail the use of fine granite pieces to smooth out the cavities created from the recent rainstorms. This project provides a safer walking environment for the pedestrians at University Glen.

University Glen Landscape Maintenance

CAL FIRE and FS Grounds are performing annual Fire Clearance of vegetation on hillside slopes in and around structures that border open space areas on the property of the University Glen residential community. This week, the vegetation on the hillside that faces Channel Islands Drive will be removed. The vegetation is removed 100 feet away from building structures and 30 feet away from vehicle parking areas to prevent property damage in case of a fire emergency.

Thank you for following our Project Updates!
