

Facilities Services Recent Maintenance Repair and Landscape Activities on East Campus

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

East Campus Water line Repair

FS Staff have identified a leaking water line parallel to Channel Islands Drive. The water line that broke provides reclaimed water to irrigate the yards around the community. The leaking pipe has now been repaired.

East Campus Landscape Maintenance

FS Landscape will begin conducting light pruning on trees located throughout the streets of the University Glen community. The tree pruning will be done in phases, breaking down the project into different sections around the neighborhood. Phase 1A of the tree pruning will be conducted Monday through Thursday from 3pm to 6pm.

Thank you for following our Project Updates!
