

Facilities Services Recent Maintenance Repair and Landscape Activities at University Glen

Facilities Services (FS) is pleased to share an update of our new, ongoing and recently completed projects. We continually strive to improve and maintain University Glen and our beautiful campus. Our staff takes pride in providing the highest quality service by using resources effectively and efficiently.

Decomposed Granite Repairs

FS Staff are in the process of repairing trip hazards on the trails of the University Glen community. These repairs entail the use of fine granite pieces to patch up cavities and uneven walkways. This project will provide a safer walking environment for the pedestrians of University Glen.

University Glen Landscape Maintenance

FS Landscape has completed the light pruning project on the trees located throughout the streets of University Glen. An FS Contractor will be assigned to maintain the trimming of these trees over the course of three years. The contractor will conduct this project in phases, beginning with Phase IA the first year and moving on to two other phases in the following years to come.

Thank you for following our Project Updates!
