

## **Pharos Mobile Printing- Step by Step Instructions**

**Send Document to Print** - The user sends or forwards documents to print (as attachments) to the email address [PrintBW@csuci.edu](mailto:PrintBW@csuci.edu) for Black and White printing or [PrintCOLOR@csuci.edu](mailto:PrintCOLOR@csuci.edu) for Color Printing.

**Receive reply email from MobilePrint** - Once the email is submitted the user receives a return email showing a list of submitted documents from Pharos Mobile Printing. It also contains instructions on how to release the documents.

**Release the Documents** - The user releases the documents from any v8 Pharos Terminal (Only HP iMFP's at this time).

\*Pharos MobilePrint does not require any print drivers or applications to be downloaded to your device so printing is easy. All you will need to do is submit your document to the appropriate email CI address and release within the two hour time period that the job resides in the print queue.
