Some people should not be vaccinated without first consulting a physician. These people include:

- Those who have a severe allergy to chicken eggs.
- Those who have had a severe reaction to an influenza vaccination in the past.
- Those who developed Guillain-Barré Syndrome (GBS) within six weeks of getting an influenza vaccine previously.
- Children less than six months of age (the influenza vaccine is not approved for use in this age group).
- Those who have a moderate to severe illness with a fever should wait to get vaccinated until their symptoms subside.

"Persons who, because of a special need or condition, would like to request an accommodation should contact Disability Resource Programs at (805) 437-3331 or e-mail accommodations@csuci.edu as soon as possible, but no later than five business days before the event, so that appropriate arrangements can be made."
