Business and Technology Partnership
California State University Channel Islands

Mission:

To foster the collaboration of technology-based and related service based companies with CSUCI and to promote technological excellence among its students, faculty, and staff for the benefit of the region’s economy.

Objectives:

1. Foster interaction between CSUCI students, faculty, administration, and regional technology-based companies through internship programs, academic scholarships, course guest lecturers, mentors, and the provision of curriculum advisors.

2. Facilitate the coordination of CSUCI academic programs and regional technology-based companies needs.

3. Support and sustain CSUCI through fundraising and corporate development in order to benefit the long-term needs of the region’s economy.

4. Advance and/or showcase the application of innovative practices and technologies on the CSUCI campus.

5. Host periodic events featuring guest speakers and topics of special interest to CSUCI and regional technology-based companies.

6. Support the development of a joint CSUCI/Camarillo research and development park to assist emerging technology-based companies, and thereby, create additional employment opportunities for graduating CSUCI students and regional residents.
