

CSU Channel Islands
Evacuation Plan
for
Main Campus and University Glen

January 2025

Executive Summary

An emergency can occur at any time without warning requiring a campus wide evacuation. Proper planning is essential to minimize the impact of any emergency on or near the main campus, including University Glen.

In the event of an emergency on or near the CSU Channel Islands campus, the evacuation of a building, area or the entire campus may be necessary. An evacuation may also be precautionary in response to credible information of an imminent threat or emergency.

With the assistance of consultants from Fehr and Peers an evacuation analysis was conducted to provide recommendations on a campus wide evacuation including University Glen.

The CSU Channel Islands Evacuation Plan is a tool to help facilitate a timely, effective, efficient, safe and coordinated emergency response to significant events affecting the campus or its population. The information in this plan intends to cover most emergencies in which an evacuation might be required but is not all-inclusive. Utilize common sense when instructions are not given.

Purpose:

The purpose of this document is to describe the high-level plan for moving people and traffic safely away from the campus during an emergency or other critical situation.

Objective:

To facilitate the safe evacuation of the main campus and University Glen during an emergency. University police will coordinate the evacuation in a planned, systematic, controlled manner with the guidance and assistance of essential campus personnel and other emergency response agencies.

Evacuation Procedures

Most days on campus are without incident, but on occasion, an emergency can occur on or near campus, which necessitates the evacuation of the campus' buildings and grounds. This can include incidents such as fire, flood, earthquake or other man-made or natural disaster which might pose an imminent threat to the campus and University Glen.

Prior to any emergency, campus community members and residents should build an emergency kit and develop a plan for how they will respond in the event of an emergency. The plan should address each of the following questions:

1. How will I receive emergency alerts and warnings?
2. What is my shelter plan?
3. What is my evacuation route?
4. What is my family/household/coworker communication plan?

Additional information and resources on planning for emergencies are on the www.ready.gov website.

Public safety personnel will assess an emergency and determine whether a campus-wide evacuation order is necessary and appropriate. Upon ordering an evacuation, the CSU Channel Islands Police Department (CIPD), in collaboration with Communication & Public relations, will issue an emergency notification with instructions to the main campus and University Glen communities. Methods of notification may include, among others, the main campus loudspeaker system, CSUCI global email, and CI Alert, as well as CSUCI's and CIPD's various social medial channels. Regional emergency information may also be communicated via VC Alert (<http://www.readyventuracounty.org/vc-alert>).

A VC Temporary Evacuation Point (TEP) is located at the Camarillo Community Center, 1605 Burnley St. Camarillo, Ca. If needed, a designated shelter site is at Padre Serra Parish, 5205 Upland Dr. Camarillo.

Depending upon the nature of the emergency and if feasible, non-designated CSUCI staff may be released early to reduce the number of people attempting to evacuate the campus at the same time. To improve operational efficiency, emergency personnel will be assigned to the following locations to conduct traffic control:

- Lewis Road and Camarillo Street;
- Lewis Road and University Drive;
- Lewis Road and Potrero Road;
- The three roundabouts along Channel Islands Drive;
- Camarillo Street and Channel Islands Drive;
- University Drive and Santa Barbara Avenue;
- University Drive and Lot A3 entrance/exit;
- Ventura Street and Oxnard Street;
- Oxnard Street and Potrero Road

Traffic control operators can help facilitate merges, prevent roundabouts from blocking up, or identify gaps for turning vehicles. Emergency personnel will also consider the appropriateness of utilizing both inbound and outbound traffic lanes for egress.

Evacuation Routes

The following information contains recommended evacuation routes on both the main campus and the University Glen community. A community member's location on campus at the time of an evacuation should determine the most appropriate evacuation route.

Main Campus

On the main campus, determine if you are on the NORTH side or the SOUTH side of campus. The divide between the two is the Central Mall.

NORTH side landmarks include University Hall, Placer Hall, Sage Hall, Madera Hall, Del Norte Hall, Napa Hall, El Dorado Hall, Grand/Petite Salons, Lot A3.

SOUTH side landmarks include Bell Tower, Arroyo Hall, Islands Café, Lindero Hall, Malibu Hall, Santa Rosa, Santa Cruz, and Anacapa Villages, Lot A10.

If you are on the **NORTH side** of campus, exit via University Drive north to Lewis Road. Turn either right or left onto Lewis Road. See attached map.

If you are on the **SOUTH side** of campus, exit via Oxnard Street to Potrero Road. Turn either right or left onto Potrero Road. See attached map.

University Glen

In University Glen, determine if you are on the NORTH side or the SOUTH side of the community. The divide between the two is Long Grade Creek.

NORTH side landmarks include Santa Cruz Island Drive, Cuyler Harbor Drive, Fry's Harbor Drive, Platts Harbor Drive, Twin Harbor Drive. Landmarks for exit in Anacapa Canyon include Santa Rosa Island drive and San Miguel Island Drive.

SOUTH side landmarks include Town Center, Anacapa Island Drive, Smuggler's Cove, Elephant Seal Cove, Frenchy's Cove, South Pool, University Glen Park.

If you are on the **NORTH side** of University Glen, exit via Channel Islands Drive north to Camarillo Street and then north towards Lewis Road. Turn either right or left onto Lewis Road. See attached map.

If you are on the **SOUTH side** of University Glen, go onto the main campus, and then follow the appropriate main campus evacuation route. See attached map.

Return to Campus

After an evacuation, please do not return to the campus until CIPD or other emergency responders have given an "all clear" notification. Once the threat to the campus has been resolved, CIPD will determine when it is safe to return. This message will be communicated by means of the emergency notification methods listed above.
