CIPD Administrative Directive

Directive Number: 2019-005
Title: Traffic Enforcement (Perimeter Roadways)
Issued By: Drake Massey, Lieutenant
Date Issued: 06-11-2019

Associated Policies / Directives:

PURPOSE: To provide guidelines for officers relative to traffic enforcement on perimeter campus roadways.

PROCEDURE:

Traffic enforcement on interior campus roadways and exterior perimeter roadways is an important part of a CSUCI police officer’s duties to ensure the campus community and University Glen residents are safe as they travel.

Our purpose for enforcing traffic on perimeter roadways is rooted in the idea that we regularly have large numbers of motorists entering and exiting the CSUCI campus and University Glen roadways and we have a duty to keep them safe.

Officers may enforce traffic laws on perimeter roadways of the CSUCI campus with reasonableness in mind. These perimeter roadways include Lewis Road from Camarillo Street to Portrero Road and West Portrero Road from Lewis Road to Oxnard Street.

While enforcing traffic on perimeter roadways, it is important to remember the extent of our jurisdictional authority as campus police officers, as well as our primary responsibility to the main campus and University Glen. Certain circumstances such as acquiring a driving pattern, closing the distance on a speeder or field training needs may draw an officer out of the perimeter boundaries described above. These types of circumstances are permissible, but should be exercised with caution.

Again, reasonableness must always be exercised when officers decide to extend themselves beyond the campus.
