SANTA ROSA ISLAND ENVIRONMENTAL SCIENCE FIELD SCHOOL

May 26 – June 23

Spend three weeks at the Santa Rosa Island Research Station this summer obtaining field-oriented environmental training and learning about the California Channel Islands. You will acquire 7-units of upper division credit while participating in the start-to-finish process of field science. At the end of the field school you will have the ability to evaluate natural and cultural resource management strategies, and to design and implement your own.

COURSES

ESRM 351 - Field Methods:
Monitoring and Assessment (4 units)

ESRM 490 - Special Topics:
California Channel Islands (3 units)
