Are you interested in being a field researcher and you love the Channel Islands? Spend three weeks in June at the Santa Rosa Island Research Station to:

• obtain training and experience common to many field-based disciplines
• learn firsthand about the natural and cultural resources of the islands
• interact with island researchers and other specialists
• apply skills to resource management in an immersive environment

Core courses:
• ANTH/ESRM 365 - Natural and Cultural History and Resource Management of the Channel Islands (3 units)
• ESRM 351 - Field Methods: Monitoring and Assessment (4 units)
• Lead instructors: Russ Bradley, Dr. Jennifer Perry, Dr. Dan Reineman

• Costs are limited to tuition (transportation, food, lodging, and class supplies are provided)
• Full and partial scholarships available for need and merit-based applicants
• Formal application process is coming late Fall semester
• If you are interested, attend one of the late October information sessions

For more information contact Russ Bradley, Santa Rosa Island Research Station Director, at russell.bradley@csuci.edu
