CSU CHANNEL ISLANDS

SANTA ROSA ISLAND
ENVIRONMENTAL SCIENCE FIELD SCHOOL

MAY 24 - JUNE 23

Spend three weeks at the Santa Rosa Island Research Station this summer obtaining field-oriented environmental science training and learning about the California Channel Islands. You will acquire 7-units of upper division credit while participating in the start-to-finish process of field science. At the end of the field school you will have the ability to evaluate natural and cultural resource management strategies, and to design and implement your own.

COURSES

ESRM 351 - Field Methods: Monitoring and Assessment (4 units)
ESRM 365 - Natural History and Resource Management of the California Channel Islands (3 units)
