ASA STYLE: WHAT IS IT?
“ASA Style” refers to the publication style of the American Sociological Association. This handout summarizes citation formatting in Sociology (not manuscript formatting).

ASA STYLE: GENERAL FORMAT FOR IN-TEXT CITATIONS
This handout provides examples for the American Sociological Association Style. For a sample of the format, visit https://www.asanet.org

- A reference list follows the text in a separate section headed “References.” References should be double-spaced and listed in alphabetical order.
- Narrative citations or In Text Citations are within the body of the essay.
- Paraphrasing is preferred over quoting text.
- Use one space after periods and all punctuation.

Authors not Explicitly Mentioned In-Text
Include a citation of the author’s name and date of publication, followed by a colon and the page number (if relevant). NO space between colon and pages.

Example:
Because publishing or even presenting research has become increasing difficult, research posters are not only “one of the most common ways of presenting research” but also one of the most important ways novice and experienced professionals in social science and science fields learn, network, and collaborate in their research communities (Silvia, Delaney, and Marcovitch 2007:117).

Authors Included in the Text
Follow the authors with the year of publication.

Example:
Silvia, Delaney, and Marcovitch (2007) found that the genre of research posters are an important means by which novice and experienced professionals in social science and science fields share research as well as learn, network, and collaborate in their research communities.

Authors Included in the Text with Page Reference
Include the year of publication and page number at the end of the quotation.

Example:
Silvia, Delaney, and Marcovitch (2007:117) found that research posters are not only “one of the most common ways of presenting research” but also one of the most important ways novice and experienced professionals in social science and science fields learn, network, and collaborate in their research communities.

Note: **Always write out all authors in the reference list.** For in text citation, you can use “et al.” after the first author, when you have **four or more authors**. For **three authors**, write out all the author’s last names in the first text citation; then use the first author’s last name and “et al.”

---

**Citing Numbers**

**Write out the word percent** in text, including parenthesis. **Use numerals with percent.**

- Example: In addition, black and Hispanic drivers were more likely to report being subjected to a physical search of the driver or having their vehicles searched (black, 7.1 percent; Hispanic, 10.1 percent; and white, 2.9 percent).

According to the ASA Style Guide, 6th edition: “In text citations and reference lists, . . . page references should be **eliding numbers** using the following rules” (39).

- Use all digits for pages numbered less than 100
  
  Example: 42-43, 92-98.

- For page ranges starting on pages numbered 100 or multiples of 100, use all digits:
  
  Example: 100-108, 1300-1325.

However:

- For page ranges starting on pages numbered 101 to 109, or 201 to 209 etc., **use the changed part only.**

- For page ranges starting on pages numbered 110-199, 210-299, etc., **use two digits unless more are needed to include all changed parts.**

**Other Resources**

According to ASA: “Traditionally, references include authorship, date of publication, title of publication, publisher location, as well as volume number and page numbers, if applicable. However, with webpages, this information is not always known, not easily identifiable, or not applicable.”

With online resources in which locations are known (such as material from the American Sociological Association), the location is included. With the example of IBM (a corporation with multiple locations), the location is unknown and thus left out.

**Other Resources: Document/Report from Website**

Last Name, First Name (or name of organization if author is unknown). Year of Publication. “Title of Report or Article: Capitalize Proper Nouns.” Sponsoring organization, if different from author. Publication month, day (if available). Location: Publisher (if any). Access date if no date of publication. URL.

(IBM 2007)

**Other Resources: Public Documents**

(U.S. Bureau of Labor Statistics 2011)
Other Resources: Video

(Edin 2018)

Other Resources: Phone Interview, etc.

Note: The ASA does not have a specific format for citing interviews, e-mail messages, conversations and other personal communications because these sources are generally cited only in the text or notes, not in the reference list. See p. 88 in the 6th edition of the ASA Guide.
