

# Examples of Storyboarding

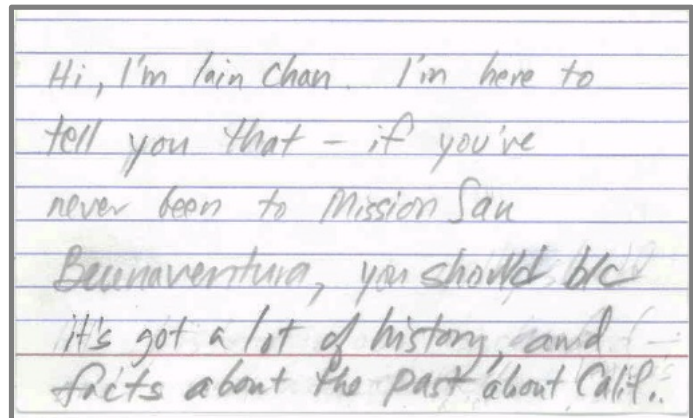

(with 3x5 Cards)

## “Visit San Buenaventura: History in our Backyard” by Iain Chan

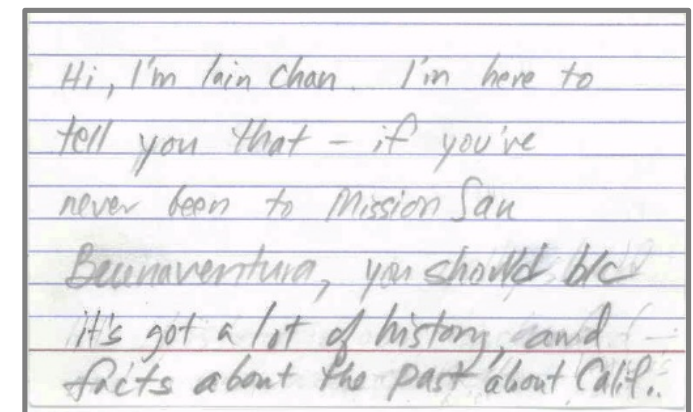

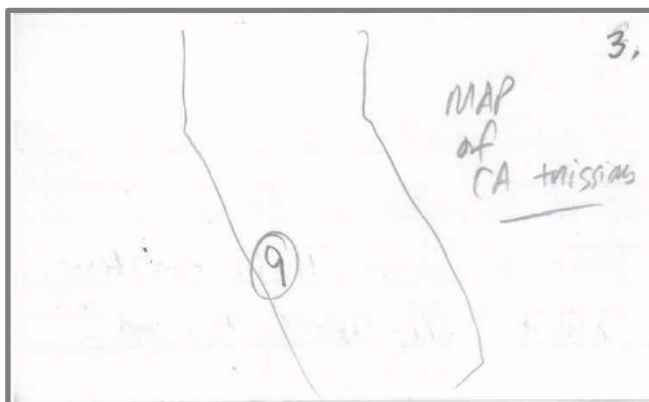

Produced on iMovie. Shot on location in Ventura, California.

Blank side used for sketching shots (here, an “establishing shot: long shot of landscape”)

Flip side of 3x5 card for dialogue/transcript. Circled card numbers for shots needed on location. This is helpful when you have limited time on location and have specific shots to take.

Mixed up different kinds of shots. Second shot was a medium close up of Iain, the guide/narrator. The third shot was a medium shot of a map panning down.

Left column: Storyboard sketches. Right Column: actual shots of the completed video.
